

7th Grade Curriculum Guide 2022-2023

Required Courses

7th Grade Core Academic Classes

English

English: Students read a range of literature in order to improve comprehension, learn grammar through literature, develop their vocabularies, and encourage their appreciation of superior writing. Standards emphasize the connection between reading and writing and focus on developing the student's ability to fully comprehend complex text including making connections, learning to cite evidence, and recognizing inconsistent or flawed reasoning. The reading/writing connection will be strengthened as students learn to apply critical reading skills when writing arguments, informative/explanatory essays, and narratives.

Advanced English: Advanced English proceeds at a more challenging pace.

Sixth-grade teachers will recommend students for this course.

Mathematics

Mathematics: Students review and expand their knowledge of the operations of whole and rational numbers by applying these operations to simple algebraic processes. Later, their ability to perform operations with fractions and decimals is advanced through a more theoretical approach using the properties of numbers, algebraic processes and word problems. Percent and proportion problems are also covered.

Advanced Math 7: Advanced math proceeds at an accelerated pace. It is a pre-algebra course. Students begin eighth-grade math in the 7th grade and will later be introduced to Algebra. Students evaluate algebraic expressions, solve one- and two-step equations, solve and graph inequalities, and graph functions.

Instruction also includes areas such as integers, geometry, rational numbers, analyzing data, problem solving, perimeter, and area. All computational skills, such as operations with fractions, decimals, and percents, are reviewed throughout the course.

Sixth-grade teachers recommend students for this course.

Algebra: Algebra is a course for students showing innate talent and advanced mathematic skills. It is designed for students who have mastered arithmetic skills and who intend to pursue a four- or five-year "advanced track" math curriculum in high school. Students in Algebra are expected to maintain an average grade of "B". If students maintain a "B" or above they are eligible to receive a high school math credit. This will not count as one of the four math classes required for graduation.

Sixth-grade teachers recommend students for this course.

Students take the Tennessee Algebra I End of Course Exam.

Science: Seventh grade science covers aspects of physical, life, and earth science. Physical science concepts include atomic structure, states of matter, substances and mixtures, and the periodic table. Cell structure,

heredity, photosynthesis and respiration, and human body systems are key topics addressed in life science. Earth science concentrates on the atmosphere and human activities that affect climate. Inquiry and technology are embedded throughout the curriculum. Seventh grade science is designed as a laboratory enhanced course to offer students a variety of “hands – on” experiences.

Social Studies - World History and Geography: The Middle Ages to the Exploration of the Americas:

Seventh grade students will explore the social, cultural, geographical, political and technological changes that occurred after the fall of the Roman Empire and in Medieval Europe. Students will also study the period from the fifteenth to the eighteenth century, including the Southwest Asia and Northern Africa, West Africa, China, and Japan, but with a heavier emphasis on western civilization in Europe during the Renaissance. Students will compare and contrast the history and geography of civilizations that were developing concurrently throughout these continents during medieval times. They will examine the growth in economic interactions among civilizations as well as the exchange of ideas, beliefs, technologies, and commodities. Students will analyze geography’s influence on the development of these civilizations as they continue their study. Seventh grade students will end the year by examining the Meso-American and Andean civilizations, and the age of European explorations.

7th Grade Rotational Classes

Physical Education: The physical education program is an instructional class that teaches students the fundamentals of team sports, the importance of regular physical fitness, and lifetime wellness

activities. Emphasis is placed on activities that condition students in physical strength and endurance as well as the development of coordination and physical skills. Students are required to have a set of physical education clothes for participation. Required PE clothes consist of mid-thigh length shorts with an elastic band or drawstring, a solid white, solid gray, solid royal blue, solid yellow, OR any Jefferson Eagles t-shirt, athletic socks, and a pair of tennis shoes. Per JMS dress code, no spandex/compression leggings, pants, or capris are allowed to be worn in PE classes. Students also have the opportunity to have their own PE locker, which requires a combination lock. Students are required to participate and dress out in proper physical education clothes.

Students must have a written note from a physician to be excused from PE.

Courses that Alternate with 7th grade P. E.

7th grade students rotate Art, Digital Citizenship, STEM Innovators, and Portrait of a Graduate throughout the school year, alternating with Physical Education.

Art: Students learn about the elements and principles of design through analyzing famous artwork as well as their own art. Students will be required to complete a still-life drawing demonstrating their observational skills and their understanding of how the elements and principles are used in their drawing.

Digital Citizenship (in Computer Applications): 7th grade classes will rotate through the computer class for one nine-week period. During the nine weeks students will learn to manipulate the following programs: MS Word and PowerPoint. Students will also learn to use MLA formatting in reports and presentations.

STEM Innovators (Bridge Design): This class will learn to utilize the 9-step design process as the students will be challenged to solve a bridge design problem. The class will then build either a balsa bridge or a balsa tower while in the class.

Portrait of a Graduate (Focused on Creativity for Careers): This course is designed to assist students in

practicing creative skills necessary to excel in future coursework and occupations. Students will learn about existing high school, college, and career pathways, and how to successfully transition into them. In Oak Ridge schools we are implementing Project-Based Learning (PBL) as an engaging instructional approach for learning these 21st century career skills. Students will participate in a survey to match their interests to career clusters that align with those interests. Students will research those specific career clusters to find prospective career choices for after high school or college. This course will emphasize academic learning goals and competencies that focus specifically on exercising creativity in careers.

Non-Required Courses

7th Grade Elective Courses

****Attention: Elective courses are ONLY available if a student is not in the RTI (Response to Intervention) program for Reading or Math. If a student is placed in RTI, they will be removed from their elective until they have shown growth in the supported subject area. Should you have any questions concerning RTI, a student's placement, or how a student can move out of RTI, please contact Stephanie Hope or John Smith.**

Advanced Vocal Ensemble: The primary focus of Advanced Vocal Ensemble is performing advanced middle school choral literature in concert. Students will learn the basics of traditional choral performance skills, as well as more advanced skills such as a cappella singing and voicing for four or more parts. Both sacred and secular choral literature will be performed. As part of the course grade, students are expected to perform in concerts, some of which occur outside of school hours. Students may have the opportunity to perform in an out of town competition performance. Students are required to have black dress shoes; boys also need black dress pants. A few previously worn girls' shoes are available to borrow.

***The choral director's recommendation is required to take this course. 7th graders with no prior JMS Chorus experience that are interested in joining Advanced Vocal Ensemble should contact the choral director, Ms. Amanda Wilson.**

Art: Art 7 includes art production, aesthetics, criticism, and art history. Students will also have the opportunity to broaden their appreciation for visual art through a trip a local museum during the school year. Students exhibit their work in local, regional, and national exhibits and competitions. The year-long class is divided into media units: drawing, painting, sculpture, computer graphics, commercial art and printmaking.

Aviation: Aeronautics: Combined class with **Advanced STEM 1 (7)** incorporating coding, math, science, engineering, and flying skills with multiple types of drones and model airplanes. Students will learn about flight safety requirements for flying Unmanned Aerial Systems and Vehicles and eventually design, build, and 3D print their own drone bodies. Students will also fly various types of drones ranging from entry level drones to advanced drones. CAD will be a major point of emphasis with students building foundational skills for 8th Grade Advanced STEM 1.

***Students enrolled in Aviation: Aeronautics will automatically be enrolled in Engineering by Design 7th Grade, a year-long class that alternates with Aeronautics.**

****Students that take Aviation: Aeronautics in the 7th grade and Focused Engineering by Design in 8th grade can earn 1 high school credit with successful completion of both courses.**

Band: Students with a year or more of Band experience will prepare a wide variety of band music for evening concerts, school assemblies, ball games, festivals, and competitions. Through these experiences, students will continue to develop their musicianship skills.

In addition to a band method book, each student is required to have black dress pants, black socks, and black dress shoes to complete the band uniform. Percussionists must have a prescribed set of mallets and accessories. As part of the course grade, students are expected to attend all scheduled band events. Students have the opportunity to participate in East Tennessee School Band clinics, solo-ensemble and concert festivals as well as an out of town competition performance.

*** The band instructor's recommendation is required to take this course. Seventh graders with no prior band experience that are interested in joining band should contact the band director.**

Career Exploration: This class can only be taken once in 7th or 8th grade.

Career Exploration is designed to assist students in discovering their personal strengths and abilities, understanding the opportunities available to help them excel in different career areas. Students will develop technical career skills such as resume building and oral/written communications. Upon completion of this course, students will know and exhibit a wide range of soft skills such as teamwork, creative thinking, collaboration, and problem solving. Students will take a deeper dive into exploring high school, college, and career pathways, and how to successfully transition into them. This course utilizes Project-Based Learning (PBL) as an engaging instructional approach, placing equal emphasis on academic learning goals and the soft skills that employers across all industries have identified as essential for career success.

****Students enrolled in this class will also take part in the Aviation course during 5th period block****

Chorus: The primary focus of Chorus 7 is performing choral music in concert. Students will learn the basics of singing in the traditional choral method, including reading and interpreting choral music notation, developing breath control, singing scales, sight singing, harmonizing, expanding vocal range, and maintaining vocal health. As part of the course grade, students are expected to perform in concerts, some of which occur outside of school hours. Students may have the opportunity to participate in an out of town competition performance. All choir students are required to have black dress shoes; boys also need black dress pants. A few previously worn girls' shoes are available to borrow. **No prior choir experience is necessary and new students to choir are welcome to enroll in this class.**

Geography and Geospatial Technologies Students will learn physical landscapes, cultures, and current events through regional geography. Students will also learn how geographic information systems (GIS) are used in multiple STEM career fields and occupations. Using Google Earth, Google Maps, and ArcGIS Online (considered the world's GIS leader), students will create interactive digital maps. Students will create an original ArcGIS Online 'Story Map' that can be entered in the Tennessee Story Mapping Competition.

Guided Study: Designed to teach students various academic skills necessary for success at the middle school level, students can receive help in organization, note-taking, planning study time, active study strategies, and grade averaging. They are encouraged to take increasing personal responsibility for their own learning. Small group setting allows for individual problem solving and troubleshooting with everyday academic obstacles. Students are enrolled based on greatest academic need.

Intro to Business, Marketing, and Careers in Aviation 7/8: New elective offering which will incorporate all aspects of the Aviation industry. Students will learn about the science and history of flight through the use of aircraft simulators, construction of gliders/model airplanes, and how the Aviation industry correlates to real world business and marketing applications. Students will also gain an understanding of the various careers associated with Aviation as well as the training that is necessary to succeed in particular aviation fields.

***High school credit is available for this course upon successful completion of an end of course assessment. Students may only earn one credit for this course either as a 7th or 8th grader.**

Orchestra: Orchestra 7 is for students with some prior string instrument experience. Students learn bowing techniques, vibrato, shifting, good sound production, and proper intonation. Students play in performances at school and in area concerts. Orchestra students participate in East Tennessee school orchestra events as well as travel to an out-of-state orchestra competition.

***The orchestra director's recommendation is required for this class.**

World Languages: Students are able to enroll in **Spanish 1** or **French 1** for the 7th and 8th grade years, provided they are in strong academic standing and have received a teacher recommendation. The Level 1 course begins in 7th grade and finishes at the end of the 8th grade year*. While this course spans two academic years, it is the same course and curriculum as Level 1 Spanish or French at Oak Ridge High School. This two year program is designed for younger students to master Level 1 proficiency at a slower pace, while maintaining the rigors of a high school course.

At the end of the 8th grade year, students will take an End-of-Course exam. Passing the EOC exam and maintaining an A or B in the class will enable students to earn a high school Level 1 credit in Spanish or French**. Choosing to accept credit is optional. If the student declines credit, the student will still be able to advance to the next language level at Oak Ridge High School, provided he/she has the recommendation of his/her World Language teacher.

***Students are unable to enroll in 8th grade Spanish or French if they were not previously enrolled in the 7th grade Spanish or French class and have not been recommended by your 7th grade Spanish or French teacher.**

****Students need 2 high school language credits, of the same language as a graduation requirement. Students are highly encouraged to take more than 2 years of a language, especially if they are planning on attending college**

Classes Recommended by Teacher for Extra Support

RTI- (Response To Intervention): is a multi-tier approach to the early identification and support of students with learning needs.

Tier 1: The Whole Class (every student is served at this level)

In the general education classroom, the teacher measures everyone's skills. This is known as a universal screening that is given 3 times a year to the whole school (Fall, Winter and Spring) to determine the students that fall at the 25th percentile or below for extra Tier 1 support. If your child falls at or below the 25th percentile your child will be placed in a Tier 2 or Tier 3 class in the areas of Math or English to provide more support because they are performing below their grade level. The screening helps the teacher work with students in small groups based on their skill levels. The school will let you know if your child is struggling and will update you on his/her RTI progress. If your child scores at Tier 2 or Tier 3 level they will be taken out of one or both of their electives. This class is fluid throughout the year, which means your child can make their way of the class by showing progress and gains above the 25th percentile. A goal is made for your child in their Tier 2/3 class an academic goal is developed in the progress monitoring software. On average, it takes approximately 6 weeks for the progress monitoring tool to show if your child is making progress on their goal.

During the intervention, the RTI team monitors students' progress to see who might need additional support. Many students respond successfully to Tier 1 support and achieve grade-level expectations.

Tier 2: Small Group Interventions (25th percentile-11th percentile)

If your child isn't making adequate progress in Tier 1, he/she will start to receive more targeted help. This is *in addition* to the regular classroom instruction (Tier 1), not a replacement for it. Tier 2 interventions take place every day during a designated period and won't miss any core instruction in the classroom.

During these extra help sessions, he/she will be taught in small groups using a different method than in Tier 1 because the first method wasn't successful. The teacher may also ask you to work with your child at home on certain skills.

The school will monitor your child's progress so it's clear whether the Tier 2 intervention is helping through 4 ½ week progress reports sent by the school.

Tier 3: Intensive Interventions (at or below 10th percentile)

If your child needs Tier 3 support, it will be tailored to his/her needs. Every day he/she will receive one-on-one instruction or work in very small groups. If he/she doesn't make adequate progress in Tier 3, it's likely that the school will recommend an evaluation for special education services. The school will monitor your child's progress so it's clear whether the Tier 3 intervention is helping through 4 ½ week progress reports sent by the school.

Core Focus: (English or Math) This class is for those students that score close to above the 25th percentile or the teacher has identified will benefit from extra support with current core classes. Students will be able to work on homework intermittently during the week and may need re-teaching of Tier 1 instruction.
